Pipeline Conference Room

Control System User Guide

Start Page

Touch logo to start using the system.

Main Page

The screenshot shows the Crestron Main Page interface. At the top, it displays the date and time: "November 5, 2018 1:20 PM" and "Pipeline Conference Room". Below this, there are three main function buttons: "Presentation" (red), "Audio Conference" (yellow), and "Lobby Display" (blue). The central area is titled "Projector" and shows "off" with a large "Off" button. To the right of the projector controls are "On" and "Full" buttons, and below them are "Image Size" and "Partial" buttons. At the bottom, there are "Wallplate (No Signal)", "Air Media", and "Cable TV" buttons. A volume control section at the top right shows "Program 0%" and volume icons. A power button is also visible. A help icon (?) is located at the bottom right of the main interface.

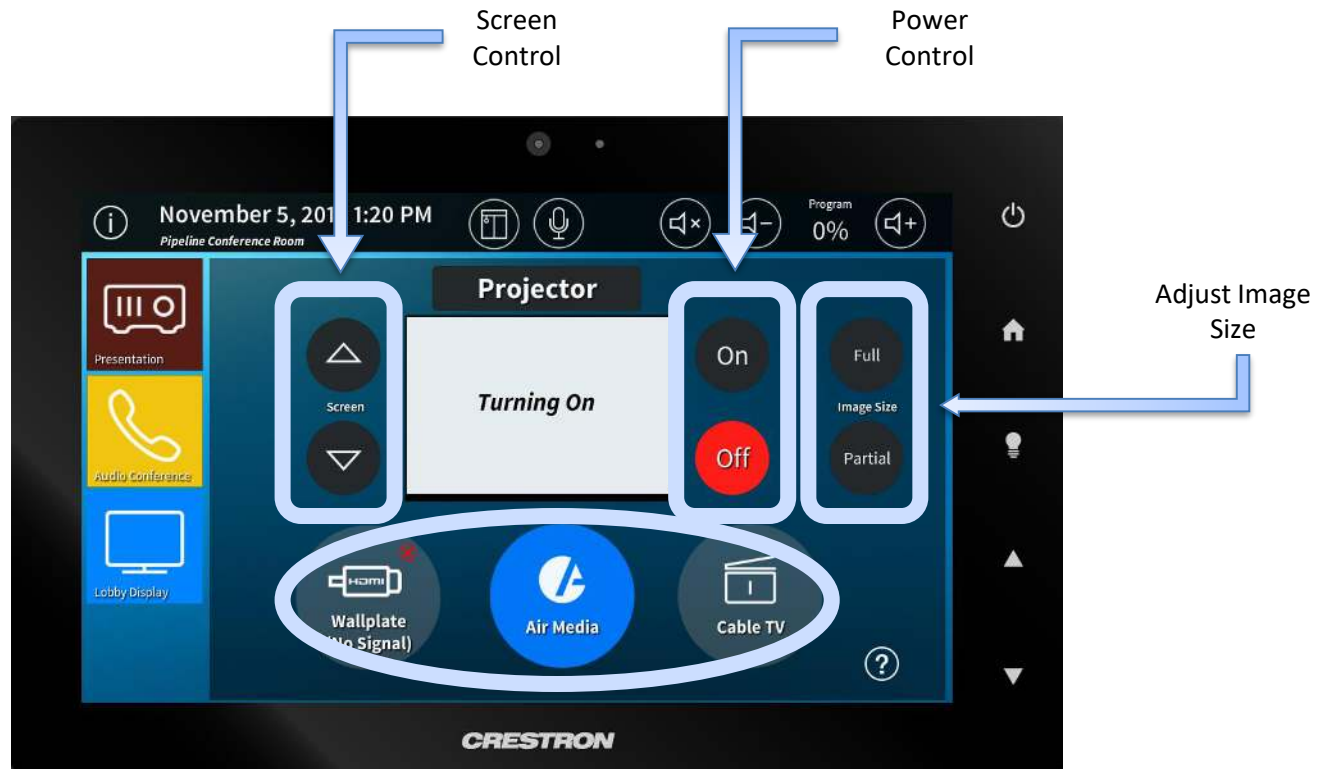

Callouts and labels:

- Shade Control Page**: Points to the top navigation bar.
- Microphone Control Page**: Points to the microphone icon in the top bar.
- Power Off Page**: Points to the power button.
- Volume Adjust**: Points to the volume control section.

- Presentation Function**: Points to the "Presentation" button.
- Audio Conference Function**: Points to the "Audio Conference" button.
- Lobby Display Function**: Points to the "Lobby Display" button.
- Select one of the 3 main function of the system**: Points to the three main function buttons.

Most pages have a help overlay. Touch the "?" to activate.

Presentation Function

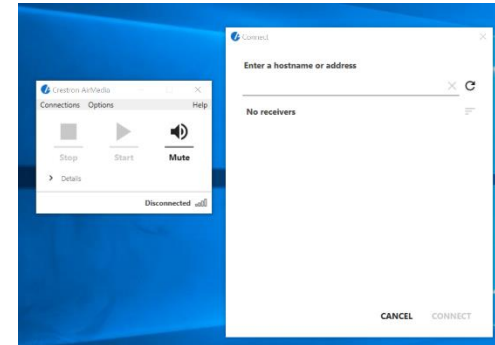

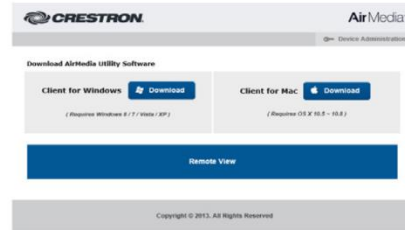

Touch one of the 3 sources to show on room displays. The displays will automatically turn on when a source is selected.

Air Media

The Air Media source is a wireless presentation system that can be used with a PC/Mac/iOs/Android

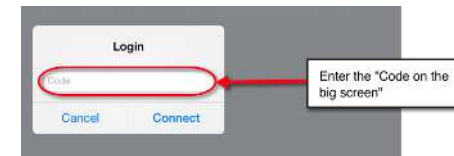

PC/Mac

1. Make sure you are connected to the "Tenant" Wifi SSID
2. Enter the URL displayed on screen into a browser
3. Click on the appropriate client link and install the application
4. Enter the address and code on screen to connect.

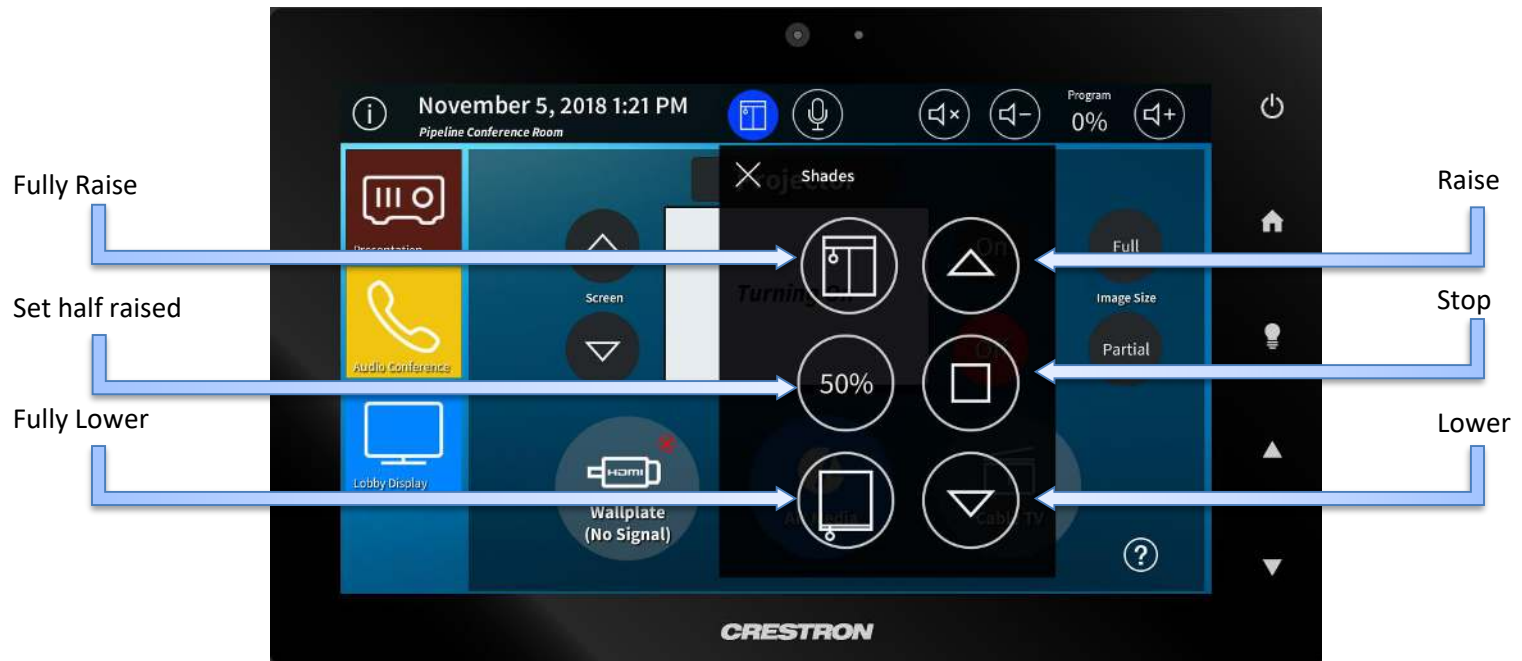

iOs/Android

1. Make sure you are connected to the "Tenant" Wifi SSID
2. Download the free "AirMedia" app from the appstore.
3. Enter the address and code on screen to connect.

Shade Control

Microphone Control

The image shows a Crestron control interface for a conference room. At the top, it displays the date and time: "November 5, 2018 1:21 PM" and "Pipeline Conference Room". Below this, there are several control panels. On the left, there are buttons for "Presentation", "Audio Conference", and "Lobby Display". In the center, there are "Screen" controls with up and down arrows. On the right, there are two microphone control panels. The top panel is labeled "Wireless" and has a green microphone icon, a volume down icon, and a volume up icon. The bottom panel is labeled "Podium" and has a green microphone icon, a volume down icon, and a volume up icon. Below these panels, there are "Privacy" and "Ceiling Mics" controls. The "Privacy" control is a green button labeled "Inactive". The "Ceiling Mics" control is a toggle switch labeled "ON" with a green indicator. Arrows point from text labels to these controls: "Podium microphone" points to the Podium microphone icon, "Wireless microphone" points to the Wireless microphone icon, "Toggle privacy : whether or not the phone participants can hear you speaking from the room" points to the Privacy button, and "Toggle ceiling microphones for audio call" points to the Ceiling Mics toggle switch.
